

PORTABLE PINBRAZING UNIT BB2

Pin brazing unit BB2

BB2 is equipment suitable for smaller maintenance or installations. The equipment can easily be carried by one person. The pin brazing process in **BB2** is electronic. The electronics replace the fuse wire on the brazing pin. **BB2** is programmed for the adjustments F, B and G. The adjustment prefix is stated on the package label of the brazing pin. The similar prefix adjusts on the control panel of the trigger unit. It is also possible to use brazing pins with a fuse wire. The capacity is approx. 40 pinbrazes with the smallest type of brazing pin and it can easily be increased by a battery charger mounted in a vehicle when the batteries are charged up during transportation between the workplaces. When alternating between charging and brazing it is possible to increase the capacity up to 100 brazes during a working day. The batteries are sealed.

Part numbers BB2

		Weights:	
Pin brazing unit	273 199 0800	BB2 without batteries	9,7 kg
Case, attaché	273 190 4551	Case, attaché	3,3 kg
Battery, 3 needed	273 900 1810	Battery, 3 needed	3x4,9 kg
Standard gun	273 199 0570	Standard gun	4,0 kg
Extension gun	273 199 0640	Extension gun	4,5 kg
Angle gun	273 199 0670	Angle gun	5,2 kg
Grinder 42V, model small	273 199 0680	Grinder 42V, model small	2,3 kg
Grinder 42V model large	273 199 0690	Grinder 42V model large	5,1 kg
Battery charger	273 199 5020	Battery charger	3,0 kg
Vehicle Battery Charger	273 199 5040	Battery Charger for vehicle	1,5 kg
Angle grinder 42V	273 199 0710	Angle grinder 42V	3,5 kg
